

CA269 Assignment

Phone Keypad Group Assignment

- Jordan Ukawoko - 20353751
- Luke Whelan - 20463814
- Cian Sullivan - 20412726
- Mark Bethal - 19451582

How to use the Software

- First of all the user must enter their name. This is the creative element part fo the assignent.
- The programme will tell the user how many different letters they need to print their name on a phone keypad
- Now the actual part - The user will be asked to enter a number for the generator to work
- For example if a user enters the number "234" it will generate the keypad numbers

Contributions

Group Members and their contributions

- Jordan - Created software and formed the base of the code
- Luke - Created software and formed the base of the code
- Cian - Debugging (Helped to find errors within the code)
- Mark - Debugging (Helped to find errors within the code)
